

Placement Cell

The Placement Cell of our college plays a pivotal role in bridging the gap between academia and industry. Our cell is dedicated to providing students with ample opportunities to launch their careers and achieve their professional goals.

Our Initiatives:

Job Fairs: We organize regular job fairs, bringing together esteemed companies and our talented students on a single platform. This enables our students to interact with potential employers, explore job opportunities, and secure placements.

Workshops and Seminars: Our Placement Cell conducts workshops and seminars to equip students with the skills and knowledge required to excel in the corporate world. These sessions are designed to enhance their employability and prepare them for the challenges of the industry.

Job Opportunities: We share job opportunities with our students on a regular basis, ensuring that they are aware of the latest openings in the market. Our cell works closely with companies to identify talent and provide them with the best candidates.

Our Goal:

Our ultimate goal is to ensure that our students are industry-ready and have a seamless transition from academia to profession.
